

Voucher Programme

The Society also offers free screening vouchers for breast, cervical, colorectal and prostate cancer to individuals who qualify. While these tests are free to people who qualify, the Society actually pays for each test. This is a very expensive program to offer but we believe it is money well spent because it promotes early detection and saves lives.

If you or someone you know is:

- a woman who is unable to afford a mammogram, pap test, or colorectal (fecal occult) test; or
- a man who is unable to afford a prostate cancer (PSA) or colorectal (fecal occult) test.

Please complete one of the following forms: [PSA voucher form](#), [Mammography voucher form](#), [Pap screening voucher form](#). Or [contact us](#) to find out more.
